MicroBooNE NuMI data, control regions, internal
prediction (MCS-calibrated)
with recombination variation
beam-on data (46,652)
pool tracks ≥ 40 cm, all periods
prediction normalised to data
LLR < −0.9: data 592, pred. 52
covariance test: χ² = 20.8/9
tracks / 0.05
over pred.
LLR score (proton −1, muon +1)
